

THE FLYING TOOL

THE FLYING TOOL is a European and Ukrainian enterprise partnership in the research, development, production, maintenance and repair of unmanned aircraft vehicles.

As a company we are committed to advancing mil-tech solutions to provide the Ukrainian Armed Forces with cutting-edge tools including FPV kamikaze drones. Our products have wide application in a range of military and natural disaster setting.

OVERVIEW

Our drones have been battle tested and proven very successfully in Ukraine. These unique drones are the future of defence, transporter of equipment, food and medical supplies. Our team is comprised of the brightest minds in the fields of engineering, aviation, IT, software development, cyber security and logistics.

We are currently producing FPV UAVs based on HRS or Crossfire formats, in the following sizes: 7, 8, 10 inches.
